

Financial Analyst – Wind Development

Employer: Skyward Energy, LLC fosters a 360 degree work and educational environment. While this is often called a “linear” or an “anti-hierarchical” structure, the Skyward team places specific emphasis on career and educational growth in order to ensure the team’s success on an individual and collective basis. We believe that every member of the team has unique talents and insight to offer and that learning flows fluidly between team members regardless of their years of experience.

Job Location: Midland, Texas (Optional)

- **Job Description** Skyward Energy, LLC seeks to add to its lean and efficient team of highly talented, results-driven individuals, in order to continue the organization’s rapid growth as a dominant player in the renewable energy industry.

The team is looking for natural leaders that have the rare talent to execute flawlessly. The Financial will be primarily responsible for developing and running financial models for a geographically and technologically diverse portfolio.

The candidate must have experience in renewable energy finance. This individual will work closely with the other members of the development team as well as the executive management team. The Financial Analyst must be process oriented and schedule-driven. Most importantly, the candidate must exhibit that he or she thrives in a team-oriented environment. The organization strategically maintains a lean, versatile staff that collectively tackles a large portfolio of projects. Thus, teamwork is paramount.

Responsibilities include, but are not limited to:

- Assisting in building and developing financial models
- Running financial models
- Interface with financial community
- Assisting in project finance efforts
- Project due diligence
- Internal portfolio due diligence
- Financial reporting
- Training team in running financial model
- Interpreting and maximizing tax structures and regulatory incentive programs

Requirements:

- 2+ years of experience in Commercial Renewable Energy Finance
- Bachelors degree required
- MBA, CFA highly preferred
- Background in investment banking, private equity, or utility preferred
- Extensive experience building and running development project and operational power plant financial models
- Experience interfacing with the financial community and raising capital
- Experience in Wind energy required, Photovoltaic and Concentrated Solar Power preferred
- Proven track record of flawless execution and ability to deliver
- Strong negotiation skills
- Fluent in interpreting tax structures
- Intellectual curiosity and a passion for learning
- Excellent oral, written, analytical and presentations skills
- Strong business and social ethics
