

Managing Director – Wind Development

Employer: Skyward Energy, LLC fosters a 360 degree work and educational environment. While this is often called a “linear” or an “anti-hierarchical” structure, the Skyward team places specific emphasis on career and educational growth in order to ensure the team’s success on an individual and collective basis. We believe that every member of the team has unique talents and insight to offer and that learning flows fluidly between team members regardless of their years of experience.

Job Location: Midland, Texas

Job Description Skyward Energy, LLC seeks to add to its lean and efficient team of highly talented, results-driven individuals, in order to continue the organization’s rapid growth as a dominant player in the renewable energy industry.

The Managing Director will serve as the team leader responsible for organizing and managing portfolio prioritization, portfolio execution, resource allocation, business development, corporate operations, power marketing and process implementation. The individual will be involved in every aspect of the business.

The candidate must have exhibited exceptional leadership in past executive management roles in addition to possessing extensive experience in development, construction, and operations that is widely known and admired in the industry. This individual must have successfully developed and placed into operation a minimum of five commercial renewable energy projects. The Managing Director must also have a proven track record of assembling execution focused, results driven, teams that consistently deliver. This individual’s goal will be to build the best, leanest, renewable development, construction, and operations in the industry while executing a deep portfolio and creating new opportunities. The candidate will be pivotal to the organization’s growth and success.

Responsibilities include, but are not limited to:

- Portfolio prioritization and resource allocation
- Assembling development, construction, and operations teams
- Successful Portfolio execution
- Corporate operations
- Process implementation
- Managing human capital
- Budgeting
- Power Marketing
- Regulatory and legislative/political interface
- Business and Commercial development

- Project acquisition due diligence
- Managing relationships with vendors and stakeholders
- Mentoring team members

Requirements:

- 15+ years of experience in Commercial Renewable Energy Development
- Outstanding leadership in past executive management positions required
- Utility background
- Project Management experience in development, construction, and operations
- Must have successfully developed and placed into operation a minimum of five commercial renewable energy projects
- Bachelors degree; MBA/graduate degrees highly recommended
- Experience and facility in running financial models, budgeting, and contract negotiation
- Proven track record of flawless execution and ability to deliver
- Strong negotiation skills
- Intellectual curiosity and a passion for learning
- Excellent oral, written, analytical and presentations skills
- Strong business and social ethics
